Consultants**

Former Roslin Institute, Midlothian

Drainage Impact Assessment

October 2016

Document Control Sheet

Client	Ironsides Farrar Environmental Consultants
Project Title	Former Roslin Institute, Midlothian DIA
Document Title	Former Roslin Institute Midlothian DIA_R2
Document No.	R2

Revision	Status	Author(s)	Review	Approval	Issue Date
R1	Issue	ADB	IMcL		March 16
R2	Issue	PL	SJM		October 16

Contents

1. Executive Summary	5
2. Introduction	6
2.1 Overview	6
2.2 Drainage Area Study Background	6
2.3 Study Brief and Objectives	8
2.4 Information Received	8
3. Existing system	10
3.1 Site Details	11
3.2 Intermittent Discharges Impacted by Proposed Development.....	11
3.3 Existing Model Update	12
4. Proposed Development & developed system amendments	13
4.1 Proposed Land Usage.....	13
4.2 Proposed Connection Details	13
4.3 Dry Weather Flow.....	14
4.4 Surface Water Runoff.....	14
4.5 Future Misconnections & Infiltration.....	14
5. Stage 1 Assessment – Existing / Developed Comparisons.....	15
5.1 Hydraulic Assessment.....	15
5.1.1 Flooding Assessment.....	15
5.1.2 Surcharge levels	16
5.2 CSO Assessment.....	18
5.2.1 CSO Spill Frequency and Volume Assessment	18
5.2.2 Formula “A” Assessment	19
5.3 Lowest Floor Level Assessment.....	20
6. Conclusions and Recommendations	21
6.1 Stage 1 Conclusion	21
6.2 Recommendations	21
Appendix 1 Development Site Layout Model Parameters.....	22
Appendix 2 Stage 1 Flow Volume Decrease Results.....	23
Appendix 3 Formula ‘A’ Results.....	32
